

I think there is ENOUGH snooping going on by the government. There are ENOUGH laws in place for wire tapping that require a Judge to decide wether to tap a phone or someones email.

If you are to pass a law to this effect you should also include in your law that US Citizens have the right to tap YOUR PHONE! If their is anyone in this country that I don't trust it you the government. If you have the right to tap my phone without just cause then I should have the right to tap Mr. Bush's and Mr. Ashcroft's phone. You all seem to forget but I haven't this is suppose to be a goverment of the people NOT a handful of men.

So when can I set up MY wire tap on them????

I would really like an answer to that question.
